

Erasmus University College Study Association (EUCSA) Pricing System

Date: 15/09/2026

These changes take effect as of 11/02/2025.

1: Current Pricing System

The current pricing system reflects general rules for Memberships, Ticketing, Events, and Sports.

Currently, the membership model of the Erasmus University College Study Association (EUCSA) is as following:

1st year of membership: 50€

2nd year of membership: 45€

3rd year of membership or above: 40€

In the past, concerns had been raised regarding the marginal difference in price between member and non-member tickets for events. The pricing strategy at the time had led to an increase in the sentiment that membership sales were over-subsidising the cost for non-member participants at some events. Therefore, this pricing strategy aims to alleviate that concern while also recovering additional funds for the association.

2: Price Gap Between Member and Non-Member Tickets:

To address the issue of subsidization, we have implemented a more distinct price gap between member and non-member tickets. The first course of action here has been designating free events as exclusively to the benefit of EUCSA members, secondly ensuring consistent implementation of price differences and that policy is clear to all those implicated.

Thereby, we have implemented a three-tiered minimum price difference between members and non-member tickets: 2.50€ for events which are free to members, 4€ for cheap ticketed events

and at least 25% added to the ticket price for events which cost more than 12 euros for members. This change encourages non-members to consider becoming members, thereby increasing the association's membership base and its financial sustainability.

i. Exception to the Ticket Pricing Policy

The mandatory price gap between members and non-members for ticketed events can be negotiated in circumstances where the proceeds will either partially or fully be donated to charitable organizations. In such a circumstance, a Committee can send the EUCSA board a proposal including the suggested ticket prices and their reasoning for requesting an exception from the standard ticket pricing policy.

3. Events & Ticketing

The implementation of a minimum price difference, especially for free events, requires event organisers and committee members to be responsible in verifying tickets. Upon receiving access to the ticket scanning through the requisite Wix app, committee members sign a privacy acknowledgement and commitment form. The checking of memberships and tickets where relevant is monitored by the Board periodically.

4. Practical Constraints

Due to feasibility constraints, this policy is not mandated for EUCSA events which occur in open spaces which are accessible to all EUC students, namely the EUC Atrium & Basement. Collaborations with partners at the faculty or external entities will also not be strictly subjected to this. Events which fulfil these criteria would be events by MEDA, SAAC, organised by EUCSA at the request of management (ex. Introweek), or Collaborations with other associations and organisations etc. These events should be seen as exceptions, and adherence to the policy listed above is recommended.

5. Sports

We will introduce a membership/pass system for sports teams within EUCSA. This system will require individuals that are solely interested in participating in sports teams to purchase a sports team pass. This pass will be priced at 20€, largely based on the costs of renting the facilities for the training sessions and games organized by Sports Co. This change is designed to ensure that sports teams can cover their costs and manage their budgets effectively. The income from the sports teams' pass will go into the total EUCSA budget and will be considered during the budget reallocation procedure.

Note: The sports teams pass is included in the EUCSA Full Year Membership.

6. Long-Term Goal

As EUCSA continues to grow and achieve financial stability, we will explore options to make the membership more accessible. This long-term goal reflects our mission statement of community fostering whilst remaining realistic in the maintenance of the association's financial health.

These changes aim to create a more equitable and sustainable pricing system for EUCSA, ensuring that members and non-members alike can enjoy the benefits and events offered by the association, while also ensuring financial stability. We will monitor the implementation of these changes and make adjustments as necessary to achieve our goals.
